- 40-year Thesis Study on Sociological World Issues
- Constitutionalist

As a pioneer in 1994 Designed a Techno-Agronomic Systems Facility: To produce Industrial Hemp Tree Free Paper, Yielding By-Products, Building Composites, CBD, genetics, and Seed Oil

The *Facility*, built around sustainable farming practices and environmental technologies, incorporates industrial hemp farming, PV solar, H2, and Agrotechnology to produce hydroponics for food, cash crops that will contribute to the mainstay of any community development. The integration and synergy of putting these mechanisms together within a combined infrastructure is a comprehensive socio-economic package containing whole solutions.
